BUDGET & RESOURCES

Technology program is driven by student learning

# CURRICULUM, INSTRUCTION, & ASSESSMENT

Four Cs - Communication, Collaboration, Creativity, Critical Thinking

Design Process

Online Testing

Flexibility & Fluency

Personalized Learning

Organizational Skills

# Students say ~

“

Google classroom is great and I think every grade in every school should use it.

“

The project went really well for me. I enjoyed doing the research and publishing on the computer. Publishing and editing went faster for me on the computer than it did on paper.

“

I'm not the neatest [writer] in the world so publishing on Chromebooks helped other people read it.

Building capacity, encouraging innovation

# PROFESSIONAL LEARNING

“Just in Time”

Professional Development Day 11/8

Visits to other Schools

MAPLE

Needham Courses and Workshops

Conferences

## Teachers say ~

“

This was one of the most useful and constructive workshops I have attended while employed at Needham Public Schools. Seeing the way certain technologies function sparked ways to make my classroom more efficient and expansive in terms of teaching to varied learners.

“

Overall, I found it useful that we could tap into the expertise that already exists in our building and learn from and alongside each other.

“

It worked well to be able to choose the workshop most relevant for our specific needs. Workshop leaders did a great job answering questions.

“

I appreciated the differentiation for each topic so teachers can learn where they are.

We don't work alone.
