# Statement of Purpose

The NCE Early Childcare Program is committed to providing a safe, enriching environment for the children of the Faculty and Staff of Needham Public Schools and the Needham community.

We are dedicated to promoting a love of learning and a strong sense of community through our nurturing care and our developmentally appropriate curriculum and practices.

## What others are saying about the NCE Early Childcare Program...

*"We have been waiting for something like this for years"*

*"Convenience to the workplace, in a community I work in and trust"*

*"One of the most valuable benefits of being a NPS teacher"*

We strive to create an atmosphere where children and families feel appreciated, respected, and inspired to blast off to new adventures in learning!

We emphasize positive social interactions between peers, and with adults, to make the Early Childcare Program feel like a home away from home.

We hire certified teachers who are dedicated to advocating for every child. These nurturing providers help infants, toddlers and preschoolers acquire the tools they need to grow and learn in a cozy setting where fun is a priority. Through a balance of large group, small group and individual learning experiences, we combine teacher led activities with child directed experiences to create a curriculum that fills our classrooms, and outdoor spaces, and touches all of our daily routines with the joys of learning and playing together.

Come be a part of our Little Rockets Crew  
...they are out of this world!!
